

Professional results through efficient workmanship with an elite team! The expertise we offer range from electronic and chemical engineering to basic project management, with particular expertise in the application of streaming current detectors in the control of flocculation dosing.

Our services include:

- Design
- Development
- Installation
- After Sales Service
- Commissioning

## PRODUCTS & SERVICES

INNOVATIVE INSTRUMENT AND CONTROL SYSTEMS DESIGNED TO SUIT YOUR NEEDS

Ion Charge analysing using the streaming current phenomenon

### SCD 16Plus

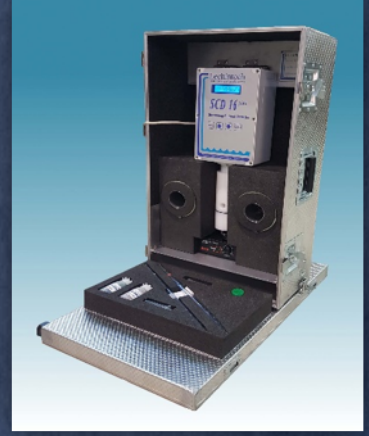

Control chemical consumption and save costs with the streaming current detector.

[Technical Info](#)

### LDT 16MP

Work smarter, not harder with the completely portable lab unit which includes all the necessary equipment for fast and efficient results.
